

CHARCOAL BARBECUE

BARBECUE PREVENTION

- Only charcoal briquettes should be used in charcoal grills.
- To ignite charcoal briquettes, use charcoal lighter fluids that are specially manufactured for this purpose. The use of any other flammable liquid is not recommended. Never use gasoline as a charcoal lighter fuel.
- To light charcoal briquettes, sprinkle them with charcoal lighter fluid and allow it to soak in. Wait approximately 10 minutes. Never add additional fluid after igniting your barbecue.
- Light briquettes with a long match or a mechanical lighter designed for barbecues.
- Always keep your barbecue uncovered during start-up and never lean over the grill during ignition.
- Before storing your charcoal barbecue, make sure to dispose of the ashes by soaking them with water and placing them in a covered metal container.

GAS BARBECUE

BARBECUE PREVENTION

- Purchase a gas barbecue that meets the standards of approval. If your gas barbecue requires assembly, follow the manufacturer's instructions carefully. If you need assistance, contact your nearest gas barbecue retailer.
- Check for leaks by applying a mixture of soap and water to all connections, hoses and the gas cylinder head. If bubbles form, there is a leak. Tighten the connections or replace the defective parts. Never use your gas barbecue if you detect a leak.
- A trained professional should replace any defective parts.
- When igniting your grill, make sure the lid is open to prevent gas build up. Use the igniter button or a lighter designed for barbecues to light your grill. Never ignite your gas barbecue with a match or cigarette lighter, you could be burned.
- When storing your gas barbecue, make sure the tank and the grill are both turned off. Never store a gas barbecue indoors with the tank attached.
- Never store a tank inside your home.

TRANSPORTING YOUR PROPANE TANK

BARBECUE PREVENTION

- Go directly to the refill station and come back home right away.
- Keep the tank in an upright position at all times.
- Keep a window open to avoid breathing toxic fumes.
- Make sure your tank is equipped with a safety plug.
- Never leave a tank in an enclosed space, such as the trunk of your car.
- Never smoke while refilling, reconnecting or transporting the tank.

BARBECUE PREVENTION

SAFETY RULES (FOR ALL TYPES OF BARBECUES)

- Keep your barbecue away from combustibles when cooking.
- When cooking on a deck, ensure that your barbecue will not tip over. Never leave your barbecue unattended during cooking.
- Barbecues must be used outdoors. Using a barbecue in an enclosed space is risky.
- Using barbecues on the balconies of apartment buildings is not recommended. The danger of toxic fumes, explosions and accidental fire spreading to other apartments is too great and happens regularly.
